

National Forensic Science Week

August 11-14, 2015

In recognition of the important role that forensic science plays in criminal cases throughout the country, the Douglas County Sheriff's Office (DCSO) would like to recognize the scientific and technical professionals that serve our community.

The Forensic Services Division (FSD) will be holding various special events at their crime lab with rare chances to get an inside look at how forensic science really works and to learn about current issues in the field of forensics.

The people who work in the DCSO FSD recognize the importance of all of the members of the team that participate in criminal investigations as well as the public that we serve.

Seeking truth and justice through science.
Douglas County Crime Lab
15345 West Maple Road
Omaha, NE 68116
